## CNP Assurances Angers, FRANCE

- DIVISION:** Sky Climber BMU & PI Division  
**PROJECT NAME:** CNP Assurances  
**APPLICATION:** Building Maintenance Unit (BMU)

CNP Assurance is the largest life insurance company in France. In 2017, CNP carried out a major renovation of their regional headquarters in Angers, France. As part of this renovation, the old BMU machine that was running on a concrete runway was replaced by a new machine running on a steel rail track.

The original concrete track was built over the insulation and waterproofing. Both the insulation and waterproofing had degraded and needed to be replaced. It was not possible to access these surfaces without destroying the concrete runway. To allow future renovation and repair, a steel rail track was installed, mounted on steel pedestals that allowed free access to these surfaces.

Sky Climber BMU & PI Division designed a new fully-counterweighted machine running on the new track line. The track line is fitted with a motorised turning table to allow the BMU to go into a parking track siding.

<b>Vertical run</b>	30m
<b>Self-weight</b>	2.5 tonnes
<b>Type of Jib</b>	Fixed length, luffing rotating
<b>Max. reach</b>	3m
<b>Rotating jib head</b>	No
<b>Length cradle</b>	2m
<b>Cradle rated load</b>	240Kg
<b>Hoisting</b>	Multilayer drum
<b>Auxiliary hoist (GRU)</b>	No
<b>Norms</b>	European Norm En1808
